

NAHEEL MUHAMMED

Full Stack Developer (.NET + React)

naheelmuhammedpk@gmail.com | +91 7306912910 | GitHub | LinkedIn | Portfolio

Professional Summary

Full Stack Developer (.NET + React) with a Bachelor of Computer Applications and hands-on internship experience building RESTful APIs, JWT-authenticated backends, and responsive frontends. Skilled in Clean Architecture, ASP.NET Core, Entity Framework, and SQL Server. Passionate about building scalable, secure web applications for SaaS, startup, and e-commerce environments. Open to both remote and onsite opportunities across India (based in Kerala).

Technical Skills

- **Frontend:** React, JavaScript (ES6), HTML5, CSS3
- **Backend:** C#, ASP.NET Core, RESTful API development, JWT Authentication
- **Database & ORM:** SQL Server, Entity Framework Core, ADO.NET
- **Architecture & Patterns:** Clean Architecture, Dependency Injection
- **Tools & DevOps:** Git, GitHub, Swagger/OpenAPI
- **Languages:** English, Malayalam

Work Experience

Bridgeon Solutions

Jul 2025 – Present

Software Developer Intern

- Developed production-ready RESTful APIs using ASP.NET Core and Clean Architecture, ensuring scalable and maintainable backend services.
- Implemented JWT-based authentication with refresh tokens and role-based access control to secure multiple backend services.
- Built responsive React frontend components with lazy loading and state management, improving user experience and interface performance.
- Designed normalized SQL Server schemas using Entity Framework Core and ADO.NET, ensuring efficient data access and referential integrity.
- Validated all API endpoints with Swagger and automated token authentication flows to guarantee reliability and security.
- Collaborated in an Agile team using Git/GitHub, actively participating in code reviews, sprint planning, and retrospectives.

Projects

Gamehub

Full-Stack E-Commerce Website

- Implemented secure authentication using JWT (access & refresh tokens), middleware-based session validation, and role-based access control to protect user data and routes.
- Developed scalable backend services with ASP.NET Core following Clean Architecture principles and RESTful API design, ensuring separation of concerns and maintainability.
- Designed optimized relational database schemas in SQL Server using Entity Framework and ADO.NET to manage game listings, user profiles, shopping carts, and orders efficiently.
- Integrated Razorpay payment gateway, handling payment callbacks, order confirmation, and transaction status updates for a complete checkout flow.
- Built dynamic cart functionality (add, update, remove, clear items) and order processing workflows with real-time cart total recalculations.
- Created a responsive frontend using React, HTML, CSS, and JavaScript, incorporating lazy loading and state management for a seamless shopping experience.

- Documented and tested all API endpoints using Swagger, ensuring reliability, security standards, and ease of integration for frontend developers.
- Used Git and GitHub for version control, maintaining clean commit history and collaborative development practices.

Education

Bachelor of Computer Applications (BCA)

2022 – 2025

Calicut University, Kerala

MES KVM College, Valanchery

- **Relevant Coursework:** Data Structures & Algorithms, Web Development, Database Management Systems (DBMS), Object-Oriented Programming , Software Engineering, Computer Networks
